

Wi-Call

Table Call Paging System

HOSPITALITY SOLUTIONS

What is Wi-Call ?
Wi-Call stands for “wireless calling” is the utilisation of wireless technology for the guests, to call the server easily

Wi-Call Table Call Paging System is designed to help guests to contact their servers direct from their table. No more hand wavering.

Guests can now push a button (one button or three button mode is available) on the table unit to contact the server. A message will be transmitted to the server’s pager, informing him the specific table and type of service requested.

You could complement your operations further with Wi- Call Paging Integrated System and Wi-Call SMS/MMS Marketing Communication to support your service staff and increase repeat visits respectively.
